Welcome to OXSHOTT DENTAL

Dr Brian Cullen has undertaken extensive training in America at the Dawson Academy, Tampa, Florida. His dedicated team care for patients on a private basis providing them with the latest preventive, restorative and cosmetic dental treatments in the industry.

Our goal is to enable you to achieve the healthy, bright smile you've always wanted through high quality dentistry tailored to your specific needs and desired results.

The team look forward to welcoming you to Oxshott Dental, providing you with the ultimate experience in dental excellence.

About Us

We are trusted

As a patient of Oxshott Dental the health of your mouth is at the heart of our Practice. We are dedicated to providing the very best in complete dentistry for all the family. We offer first class dental care, maintenance and hygiene and excel in the detailed treatments of orthodontics and dental implants.

We are experts

Led by Principal Dentist Dr Brian Cullen, our talented team of health care professionals are qualified in the most pioneering dental treatments and are passionate about remaining at the forefront of our profession. We invest in their continued training and state of the art equipment so that we can give you unparalleled care. When it comes to healthy, natural looking teeth there can be no compromise.

We are friendly

Shining examples of understanding, honesty and professionalism, our welcoming team understand that a trip to the dentist is not without apprehension. We care about making your experience as positive as it can be, which is why each one of us will take the time to listen to and reassure you. When it comes to more complex dental work you can trust us to explain all the options, giving you the confidence to decide what is right for you.

We are proud to be Oxshott Dental

BY OXSHOTT DENTAL

Treatments

We provide general dental care to complex dental rehabilitations. We are at the forefront of our industry and provide the very latest treatments.

We take great satisfaction in investing in our hardworking team, technology, and training in order to achieve dental excellence.

Here is where your naturally beautiful smile begins.

Invisalign

Teeth Whitening

Routine treatments

At Oxshott Dental we provide all the treatment you require to help you maintain a healthy functioning mouth and the smile you deserve. We will take care to discuss your individual needs and help you reach the appropriate decision on what treatment is right for you. At each appointment we carry out routine cancer screening checks.

The Dawson Academy

The Dawson academy is located in Tampa, Florida. Dr Cullen and his team have undertaken extensive training with the academy in order to provide patients with predictable and sustainable results.

The primary principle of Dawson dentistry is to achieve long-term maintainable health and comfort as well as the creation and maintenance of a beautiful, natural smile. This concept requires careful examination and treatment planning designed to help patients understand their treatment needs in order of priority.

Invisalign

Invisalign® treatment is the most advanced clear aligner system³ in the world, backed by more than two decades of innovation. Unlike other braces, Invisalign® clear aligners are removable and virtually invisible aligners that gradually straighten the teeth. Dr Cullen has completed extensive postgraduate training and is proud to be a platinum Invisalign provider.

Teeth whitening

Many people are dissatisfied with the colour of their teeth which can become darker over time.

Following a set of impressions, custom-made trays will be made to allow you to achieve the natural, brighter, whiter results you desire.

Cosmetic procedures

Dr Cullen and his dedicated team are committed to providing you with clinical excellence. We routinely treat patients for complex full mouth rehabilitation including cosmetic cases such as composite bonding, veneers and crowns.

Dental implants

Dental implants are a long lasting and excellent treatment for replacing missing or failing teeth and securing dentures. The specialized implant treatments must be done correctly and with extreme care. At Oxshott Dental, we use the latest materials and equipment, and supported by our committed and experienced staff. Find out how treatment with dental implants can be both painless and affordable.

Restorative procedures

There are several types of crowns, ceramic (tooth colored crown) are the most popular, because they resemble your natural teeth. They are highly durable and will last many years. They are made to match the shape, size, and colour of your teeth giving you a natural, long-lasting beautiful smile.

Periodontal treatment/Hygiene

Gum disease is one of the leading causes of tooth loss in adults. Despite this, many people are unaware of how to properly care for their gums and avoid seeking treatment.

To avoid gum disease, we recommend a positive oral home care routine alongside routine visits with one of our experienced hygienists. At Oxshott dental, we take the time to work together to ensure the long term health of your gums. We will design a program of appointments tailored to your individual treatment needs and pride ourselves on being a highly proactive preventative periodontal practice.
